

Breakthrough Technology Delivers The Competitive Power to Win!

Unleash the
Body's Power

ThermoWave Therapy comfortably, safely and effectively stimulates tissue heating to depths of 15 cm to maximize performance and accelerate healing, as never before possible.

Pre-Event Muscle Conditioning Without Warmup

- Increases localized blood flow up to 1500% to key muscle groups to quickly deliver oxygen and nutrients that condition these muscles and soft tissue for peak performance
- Improves muscle function and contraction, increases tendon extension and reduces muscle and joint stiffness
- Limits free radical damage to soft tissue and reduces skeletal muscle breakdown or injury

Post-Event Therapeutic Healing in Half the Time

- Increases the metabolic rate to accelerate soft tissue repair, decrease inflammation, and provide rapid pain relief
- Increases muscle recovery by reducing lactic acid build-up and hastens repair of damaged micro-fibers
- Accelerates removal of necrotic debris, enzymes, and excess fluids with highly efficient tissue drainage, thereby reducing recovery time by up to 50%
